

# Healthcare Blankets *that feel like home*

## THE COLOR OF THINGS TO COME

Healthcare facilities are increasingly committed to updating their image and making patients feel more at home. Key to this transformation is a shift in décor – from traditional to colorful and inviting.

Medline textiles will help facilities achieve a modern, homey look. Our array of blankets, bedspreads and quilts offer ultimate comfort – with bold colors, better choices and the ability to coordinate. Not to mention the most tightly-woven construction for a maximum “snag” prevention.

We use premium dyes to provide an exceptional color retention so that the brilliant colors will be enjoyed for the life of the blanket. And we strategically stock more than \$50 million in inventory throughout 30 U.S. distribution centers, so our products are always available for any redecorating needs.

Adding color is the simplest, most cost-effective way to reenergize a room. Medline makes it easy. Check out our collection of stylish quality blankets to spruce up any space!

## WHAT MAKES A BLANKET WARM?

The warmth of a blanket is determined by how tightly the blanket is woven. It is a common misconception that a "heavier" blanket is always warmer, however this is not necessarily true. An open-cell weave will lose more heat than a tight weave.

## Gemini® Spread/Blanket – A Touch of Flair for Any Room

### GEMINI SPREAD/BLANKETS

## Cozy Quilts and Inn Collection – Built to Last Twice as Long

These home-style quilted bedspreads are designed exclusively for health care use – they're built to be beautiful, durable and practical. Nylon stitching means they last longer than most other heat-sealed bedspreads. And the cotton/polyester blended face fabric, combined with 100 percent bonded polyester fill, virtually eliminates bunching.
