Respiratory Care

Breathe Easy...A Complete Line of Respiratory Products

MEDLINE

Ensuring Your Success in Respiratory and Anesthesia Care

Medline is a market leader in one–source respiratory care for Oxygen Therapy, Suction, Trach Care, Asthma Management, CPAP and Aerosol Therapy. We are clearly focused on the future of Respiratory products and strongly believe service and quality are the keys to daily success in this business.

Our focus will be to listen to you about your needs and partner with you to be your one BEST source of quality products, service and programs.

Table of Contents

Oxygen Therapy

Patient comfort, clinical and customer effectiveness inspire our products. Medline's extensive line of Oxygen Therapy products increase the amount of oxygen in the blood and help improve patient comfort. Our products range from our exclusive oxygen concentrator to our wide variety of O_2 delivery regulators, conservers, humidifiers, disposables and a high-quality AMBU bag line. We also offer the unique Soft-Touch cannula, that is available in a variety of sizes and styles. It is a soft, pliable, over-the-ear nasal cannula that provides a better patient fit and comfort.

Compact Design & Solid Engineering
converge in the NEW EndurO$_2$ Oxygen Concentrator

Design keeps portability in mind

- Compact, continuous 5-liter concentrator

- Weighs only 41 lbs.

- Wide-set wheels for stability

- Integrated handles on top and on each side

Maintenance is practically effortless

- Three-year limited warranty

- Easy access to all three filters without tools

- One way check valve prevents backflow and allows every 4 year bacterial filter change

- Easy access to all internal components

- Nationwide warranty/service center system

- Hotline: 1–866–225–9804
  - maintenance/repair
  - technical questions

- Product training available
  - ★basic operations and maintenance DVD
  - in–depth routine service and maintenance

Convenience is built right in

- Easy view instrument panel (65° angle)
  - power switch
  - reset button (circuit breaker)
  - flow settings
  - hour meter
  - indicator lights

- Filter replacement frequency
  - cabinet   (one/two times a year)
  - compressor   (annually)
  - bacterial/viral   (every four years)

*Basic operation and maintenance video is easy to understand.
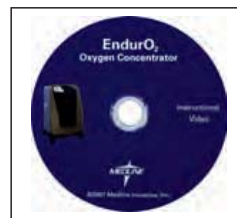

Available from your Medline sales rep.

Specification	Model HCS021	Model HCS02
Equipped with OCI (Oxygen Concentrator Indicator)	No	Yes
Alarms	Power Failure High and Low Pressure	Power Failure High and Low Pressure Low O$_2$ Purity
Dimensions	22"H x 15"W x 12"D	
Weight	41 lbs. (18 kg)	
Electrical	115 V AC, 60 Hz, 3.8 Amps, 420 W max. Double insulated cabinet	
Max. Outlet Pressure	8.5 +/- 0.5 psi (0.6 +/- 0.1 bar)	
Flow Range	1 - 5 L.P.M.	
Oxygen Concentration	93% +/- 3%	
Filter	Cabinet Compressor Intake Bacteria	
Sound Level	50 dBA +/- 2 dBA

Oxygen Analyzers

Max-O_2 features an integrated O_2 Sensor for greater reliability, and is ideal for homecare and nursing home use. Includes corrugated tubing adapter.

The **"Handi"** is designed to be maintenance-free and disposable at the end of the sensor life. This analyzer is great for spot checking O_2 percentage in hospitals, clinics, and in home care environments.

Both feature
• Easy, one-step calibration
• 2-year warranty—analyzer and sensor

Mouth to Mask Resuscitator Protects the Rescuer and Victim with a Highly Effective Viral and Bacterial Filter

This ready-to-use CPR mask is made with protection in mind as it features a one-way filtering system to protect the victim and rescuer at the same time. The clear plastic design allows for easy placement while the soft inflated cuff provides patient comfort and a better fit. Standard 22mm fittings allow the mask to be used with any resuscitator. Simplified graphic and anatomical illustrations are printed on the hard plastic carrying case.

Ambu SPUR II Manual Resuscitators

Ambu SPUR II features a unique shape that is small and easy to hold, yet provides optimum stroke volumes with just one hand. The bag itself is thin and responsive and the SafeGrip surface ensures that the Ambu SPUR II can be firmly squeezed.

All Ambu SPUR II resuscitators come in individual, re-sealable plastic carrying bags, complete with one or more masks and many special accessories. The bags themselves are color-coded for fast identification of infant, pediatric, and adult sizes.

KEY FEATURES
• Unique single-shutter valve system for reliable functionality
• Integrated handle for user comfort and uniform compression
• Thin-walled compression bag allows for lung compliance and "feel"
• SafeGrip surface for secure handling in stressful environments
• Medication port permits quick medication delivery without disconnecting the Ambu SPUR II from the ET tube

WST0101	Mask, Nasal, BI Flo Cannula	25/cs
HUD1850	Dual Lumen Cannula, 5' standard tubing	25/cs
WST0137	Adult Micro Cannula, 7' standard tubing	50/cs
HCS0440	Ear Cushion Set	50/cs

★HCS4511

All cannulaes feature crush-resistant tubing as a standard feature for greater patient safety.

Our "Soft-Touch" Cannulas have curved, non–flared nasal prongs

★**Our economy cannula is ideal for the short term post-operative patient needs and even in some long term care cases. It has straight, non-flared nasal prongs**

Medline Oxygen Tubing

Medline oxygen extension tubing comes standard, latex–free, crush resistant, and low memory. Our Unique "relaxed" low memory tubing helps prevent undo kinking. Violet relaxed tubing provides greater visual contrast for improved safety. Available in a variety of lengths.

Digit® Finger Oximeter

The Digit Finger Oximeter is a Pulse Oximeter and Sensor in one unit providing fast, reliable SpO2, pulse rate and pulse strength measurements on patients from pediatric to adult. Its pocket-size with a large LED display, one button keypad. The auto power shutdown after 8 seconds when not in use, makes it ideal for emergency, hospital or clinical environments, or for home use.

Item #	Description	Pkg

Disposable Oximeter Probes Offer a One Year Warranty

Our new line of replacement sensors are all latex-free and are applied with three different adhesives.

- Micro-foam – best for easy sensor application and re-positioning
- Medplast – best for its maximum adhesive for long-term uses in one location
- Transpore – best for transparency with re-positioning

These disposable sensors are available for use with BCI, Nellcor (Non-Oxi-Max 9 Pin), Nonin and Ohmeda pulse oximeters and come in a variety of sizes. **Other probes available, contact your Medline representative**

Medline is a leader in the respiratory market and we are proud to offer you a complete line of oxygen-therapy supplies and equipment. Our innovative products are designed for clinical effectiveness as well as patient comfort. Medline stands behind its products through enforcing strict quality guidelines. As we look to the future, our goal is to provide you with superior quality products, and programs to strengthen your business with unsurpassed customer service.

NEW!

HCS2CON1L

The EconO$_2$mizer II "Lightweight"

Medline's new single-lumen pneumatic conserver

Medline introduces its new single-lumen pneumatic conserver – the EconO$_2$mizer II Lightwieght. This lightweight and compact unit has the greatest number of settings for standard continuous and conserving flows. The EconO$_2$mizer II features all brass in high-pressure zones, which is recommended by the FDA for fire prevention.

- Small size and light weight make unit less obtrusive and more portable
  (L: 4.8", W: 2.4". H: 1.5", **Weight: 13 oz.**)
- Six conserving flow settings
- **Three continuous flow settings**
- Brass piston assembly – safer than aluminum
- Pulse design makes less noise and is less irritating to patient and those around them
- 5.7:1 conserving ratio throughout the entire range

Item Number	Description	Packaging
HCS2CON1L	Single-lumen pneumatic conserver, lightweight	each
HCS4514	Adult Cannula, Soft-touch, 7' crush-resistant tubing	50/cs
HCS4504	Adult Cannula, Soft-touch, 4' crush-resistant tubing	50/cs

The EconO$_2$mizer

Dual-lumen oxygen–conserving device

Medline's EconO$_2$mizer represents a breakthrough in conserving-device technology. With components like a patented all-brass diaphragm, the EconO$_2$mizer reduces your service calls and provides patients with a lighter and more compact design.

- Zero to 6 lpm and 11 flow settings
- Dual mode for conserving and continuous flow with 11 settings for each mode (No additional regulator required)
- 4:1 conserving ratio for fewer service calls
- Solid brass core for maximal safety
- Laser-etched markings prevent chipping and flaking

HCSO2CONS

Dual mode switch

Item Number	Description	Packaging

Medline Electronic Mini-Conserver

The Mini-Conserver features a 5:1 conserving ratio and automatic shutoff. In continuous mode, it has a flow rate of 2 lpm. The Mini-Conserver has a six-month battery life (approximately 100–M6 cylinders) from one AA alkaline battery.

- High-pressure brass chamber
- Battery life indicator and battery test mode
- Measures 1.9" x 3.3" x 3.3" and weighs only 14 oz.!
- Easy-off handle
- 870-style post valve
- Conserve flow settings - 1, 2, 3, 4, 5

Oxygen Cart Systems

Rack'n Roll Modular Cylinder

Makes the moving and storing of aluminum medical cylinders easier.
This complete modular product easily meets your rack and cart needs.
• Heavy-duty rubber tires (removable for stationary cart)
• Telescoping, height-adjustable holders
• Easy-to-hold hand grip for extra comfort
• Each six cylinder cart can link to make larger system (12, 18, 24 cylinders)
• Adjustable holder height allows each tank tray to accomodate different sizes

Handle adjusts from 36"-42"!

No Smoking Oxygen In Use

Flowmeters available for both oxygen and medical air.

The durable polycarbonate hood and metering tube are impervious to the most common hospital cleaning and disinfecting solutions, and are rugged enough to stand up to the hospital/nursing home environment.
- All are 0-15 LPM flow range, with minimum 65 LPM flush flow rate.
- Most are available with either a brass or aluminum body (aluminum body flowmeters weigh almost half as much as the brass bodies)
- Calibrated at 50 psig and 70° F, and are 100% tested to ensure accuracy.
- Needle valves in the flowmeter bodies provide precise flow control.
- All flowmeters are back-pressure compensated.
- 5-year warranty

Weight (No adapter): Aluminum Body – 4.24 oz./122 gm
  Brass Body –6.64 oz./188 gm
Increments: 0 – 6 LPM in 1/2 LPM increments,
  6 – 15 LPM in 1 LPM increments
Flush Flow Rate: 65 LPM (depending on supply flow)
Max Inlet Pressure: 100 psig
PTO Flow Rate: Over 100 LPM (depending on supply flow)

Large Volume Aerosol Therapy

Medline's Aerosol Therapy product line covers a wide array of applications, from products that assist in care for the home tracheostomy patient, to a traditional post-operative patient who needs airway re-hydration. Medline can provide the equipment needed for any application. Whatever your aerosol needs, Medline has your solution.

The 50 PSI MaxiCompressor

It is designed for continuous aerosol humidification applications and to run 24 hours a day, 7 days a week reliably. It features a locking pressure regulator valve, a removable protective lid, Thomas Compressor, and washable filter.

The MaxiCompressor's excellent airflow characteristics mean lower operating temperatures and longer life.

Kido's Bear Provides Effective and Immediate Treatment for Pediatric Patients

The Bear is a new innovative delivery system for aerosol and oxygen therapy for children with asthma or other acute respiratory diseases.

• Delivers medication from a standard nebulizer
• Provides oxygen (therapy only)
• Calms the pediatric patient while providing effective and immediate therapy
• A nebulizer and oxygen line are included with each bear
• Available in yellow and blue (three of each individually wrapped in a case)
• As effective as wearing an aerosol mask

Item #	Description	Pkg
HCSKBN4300	Kiddos Bear	6/cs

Ideal for Pediatric & Alzheimer's Patients

TeddyNeb Nebulizer

TeddyNeb is a pediatric nebulizer compressor. The bear design is less intimidating to children. Comes with a mouthpiece, 2 sizes of masks, 3 spare filters, and a back pack carry bag.

• Five year warranty
• Quiet performance
• Quick treatment time
• Safety shut off via an overload protector

Suction

Medline is a market value leader of suction products in the U.S. We manufacture, supply and directly support our full line of products that includes open and closed suction catheters, yankauers, suction canisters, absorbent pads, suction tubing, solutions and more. We also provide a full line of liquid medical waste solidifiers and disinfectants to minimize exposure to infectious waste.

Medline Suction Catheters with the Contro-Vac™ Valve Helps Protect Caregivers

Promote Better Infection Control

Why risk contamination when you can use Medline suction catheters with the exclusive Contro-Vac valve—proven more effective than chimney valves at preventing contact with fluids. Our 5-in-1 Connector and Stabilizing Bar ensure easy connection for any size tubing and a secure grip.

5-in-1 Connector & Stabilizing Bar

Proven superior in lab tests

In an independent laboratory evaluation★, Medline suction catheters with the Contro-Vac valve were compared to leading manufacturers' catheters with chimney valves. The results? Medline catheters were proven more effective at preventing the release of microbial contaminant during the suctioning process.

★ *Geneva Lab Study (1995)*

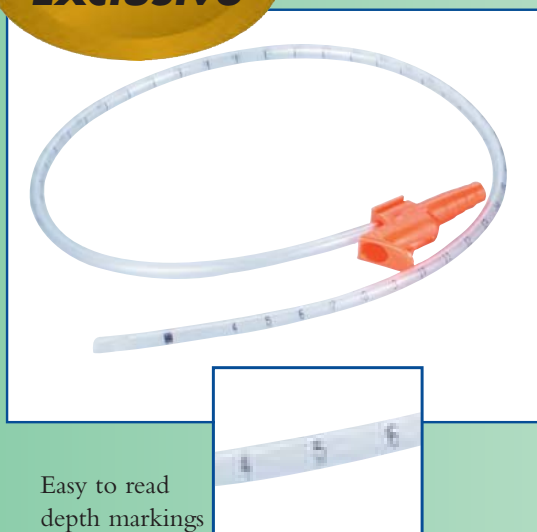

Medline's Contro-Vac valve

Traditional chimney-valve catheter

A complete line of unique suction catheters and kits

Medline suction catheters are a better solution for your everyday needs. The following pages will reveal the value of our unique suctioning products.

Medline Exclusive

Easy to read depth markings

Medline Depth-Marked Suction Catheters

The safe-suctioning technique, using depth-marked suction catheters, has been practiced for years with newborn and pediatric patients. The ATS (American Thoracic Society) strongly recommends the use of these depth-marked suction catheters for all patients★ to help reduce trauma and infection potential.

★*American Journal Respiratory Care Medicine Vol. 161, pgs 297-308*

Suction Catheter Tip Descriptions

DeLee Tip

DeLee Tip
Flat, soft & smooth tip that maximizes newborn, infant and child airways safety. Standard for sizes 6Fr, 8Fr and some 10Fr

Whistle Tip

Whistle Tip
Angled, soft and smooth tip that minimizes trauma potential to adult large airways and maximizes suctioning capability. Standard in 10Fr, 12Fr, 14Fr, 16Fr and 18Fr sizes.

Steri-Cath®
Closed Suction Systems

Maxi-Flo® Suction Catheter

Steri–Cath® Systems use the Maxi-Flo® catheter, which is calibrated to assist in proper placement. The soft catheter combines the beveled tip to reduce tracheal and carinal trauma. Each Maxi-Flo® catheter has a large inner diameter for maximum suction efficiency.

Flexibility without Compromise

Steri-Cath® unibody systems reduce the risk of contamination by eliminating clinician contact with the catheter. It also maintains a closed airway to reduce aerosolization of secretions and oxygen desaturation while allowing constant patient ventilation. These systems are cost-effective and convenient to use.

Dual Swivel Elbow

An angled patient elbow combined with a dual axis swivel provides torque relief at both the circuit and airway connection (15 mm OD swivel connector at the circuit and 15 mm ID swivel connector at the airway).

PTX610114

Wiper Seal

An efficient wiper seal maintains PEEP and cleans secretions from the catheter.

PTX615114

Soft, Flexible Sleeve

A sleeve encloses the catheter to reduce contamination to both health care personnel and patient.

Single-Step Thumb Valve

The thumb valve allows simple on/off manipulation of the suction source. Raised edges prevent the valve from being inadvertently activated.

Gomco Stand Mounted Aspirators and Pumps
Dependability and Mobility in One

Model 6037 pump provides suction for all routine suction procedures with one versatile mobile vacuum source. The ease of operation is simple and consists of four basic steps

1. Set the Mode Switch – Constant/Intermittent
2. Set the Intermittent timing – if needed
3. Turn on the power
4. Adjust the vacuum level

Performance Specifications:

Mode	Vacuum Range	On/Off Cycle Time
Constant	0–250mmHg	On–5-90 seconds
Intermittent	0–200mmHg	Off–23 seconds

GMC6037

Item #	Description	Pkg
GMC6037	Disposable bottle, diaphragm compressor, 1/8 HP cont duty motor, 33"Hx17"Dx23"W, 78 lbs.	each

Gomco suction systems are equipped with an easy-to-read gauge (inches Hg and mmHg), and a suction regulating valve. These models also include illuminated on/off switches.

Model 3021 pump's diaphragm unit is designed for general suction use. Its powerful 1/8 HP motor creates up to 22 in. Hg vacuum

Item #	Description	Pkg
GMC3021	Disposable bottle, 0 to 22 in. Hg vacuum range, 33"Hx17"Dx18"W, 69 lbs.	each

Model 6000 pump is designed to help assure gentle suction for such specialized uses as gastric lavage, abdominal decompression, duodenal and fistula drainage and drainage following prostatectomy.

| Item #	Description	Pkg
GMC6000	Glass bottle, 90mm and 120mm Hg vacuum setting, 33"Hx17"Dx18"W, 58 lbs.	each

Medline/H2OR Absorbent Products are the industry's most complete line of premier absorbent products designed to keep the O.R. floor dry, safe and clean.

Create a safe environment in the O.R. by using the Medline/H2OR line of absorbent products to keep the floor free of irrigating fluids. Medline JumboJug, pads and wicks are cost-effective alternatives and competitive products. From floor aspirators, absorbent wicks and pads, to the final fluid collection, Medline/H2OR products absorb fluids on contact to prevent cross-contamination.

Multi-Connection

NEW!

JumboJug Large Volume Suction Canister

- **Sleek profile/integrated handle** reduces the risk of fluid contact and makes transporting simple and efficient.
- **Secure cap** is a snap to use and will accept three devices, including the PowerWick XL.
- **Jumbo collection capacity** 13,000ml (13 Liter) capacity.
- **Fits a standard kick bucket stand**
- **Saves surgical time** by eliminating frequent canister changes when fluid is abundant.

Item #	Description	Pkg
DYNDJJ13K	JumboJug, 13,000 ml	6/bx

JumboJug – DYNDJJ13K

PowerWickXL does not simply absorb – it inhales

This floor aspirator was especially designed for procedures requiring the absorption of a large amount of pooled fluid.

- **Available in 5 foot length**.
- **Low-profile design** is quiet, yet has tremendous vacuum force and pulls in unlimited amounts of fluid in seconds from all sides.
- **Connect to any OR wall vacuum** via JumboJug or standard suction canister.

Introducing…
Medline Lipo-Suction Clear Vinyl Tubing

DYND50110

"We trialed Medline lipo-suction tubing in three different cases today with three different plastic surgeons. . . The physicians and the nurses liked it better than the "special" order tubing we are using because it is longer, more flexible and easier to use. We will now use Medline's lipo-suction tubing."

HealthSouth Outpatient Surgery Center
Birmingham, Alabama

We manufacture our heavy–duty lipo-suction tubing with 1/4" wall thickness for strength and flexibility.

- Universal Fit
- Highly Durable
- Easy–to–Use Flexibility
- Utilize with pressures up to 29.5 in Hg (Mercury)

Item #	Description	Pkg
DYND50110	3/8" x 5/8" x 10'	10/cs
DYND50112	3/8" x 5/8" x 12'	10/cs

Sterile Non-Conductive Connecting Tubing
- Available in 5mm (3/16") or 6mm (1/4") inner diameter tubing.
- Ends have female connectors to securely fit any male connector.
- Utilize with pressures up to 22 in Hg (Mercury).

Medline Sterile Solutions Complement Our Suctioning Line

Pre-packaged sterile saline and sterile water in convenient, ready–to–use containers provide just the right amount of solution necessary for the procedure. Reduces the risk of cross–contamination and potential waste of bulk containers. Bottles are great for device irrigation and suctioning, while the cup size provides the proper amount for suctioning.

SafeSorb™ Fluid Solidifier Is Simply The Safest

SafeSorb is the safest fluid solidifier because it is designed to be poured into an empty suction canister, before a procedure is started★.

Pouring SafeSorb into an empty suction canister offers significant benefits to hospital personnel:
Safety! It is safer to pour a solidifier into an empty suction before a procedure starts, rather then opening a port on the suction canister lid to add a solidifier at the end of the procedure, when the suction canister is filled with liquid waste. This benefit:
- **Prevents spilling** the canister contents while pouring the solidifier into a suction canister that is filled with bio–hazardous waste.
- **Eliminates employee exposure** to aerosolized bloodborne pathogens by not having to open a port on the canister lid when the canister is filled with bio–hazardous waste; and,
- **Reduces O.R. turnover time**. With SafeSorb in the suction canister at the start of the procedure, the canister contents are solidified when the procedure is done. This eliminates having to find a bottle of solidifier after the procedure, opening the canister lid and pouring the solidifier into the contaminated canister, then waiting for the canister contents to solidify.

★ *SafeSorb can also be added to a suction canister at the conclusion of the procedure. SafeSorb will not materially impact the fluid volume indicated on the graduated lines of a suction canister.*

Visit www.safesorb.com:
- For more information about SafeSorb.
- Links to OSHA and Department of Transportation guidelines.
- To quickly and accurately compare the cost of using SafeSorb versus Dornoch, Neptune or a solidifier disinfectant.

Isolyser LTS-PLUS®
Fluid Disinfectant/Solidifier

Isolyser LTS-PLUS is EPA registered for the treatment of liquid medical waste that allows disposal directly to a landfill as "**white bag**" waste in 36 states. This allows you not to have to segregate your "white" and "red" bag waste and minimizes exposure.

The patented SAF-T-TOP™ system reduces the need to open a suction canister's pour spout, thereby, preventing powder spills, aerosolizing, and infectious splashes.

LTS-PLUS utilizes a chlorine-based disinfectant that is preferred for its quick action and non-offensive aroma.

It is available in unit dose vials for treatment of canister or liner liquid medical waste.

Item #	Description	Pkg
MRSLTSP1500	Solidifies 1500cc's of fluid	100/cs
MRSLTSP2000	Solidifies 2000cc's of fluid	100/cs
MRSLTSP3000	Solidifies 3000cc's of fluid	100/cs

SHAKE WELL

5 EASY STEPS!

1. PULL
Leave vacuum on. Pull the patient tubing off the suction canister.

2. PULL TAB
Remove red pull-tab from LTS-PLUS bottle

3. PLACE
Place the LTS-PLUS SAF-T-TOP down over the patient/ortho port on top of the suction canister.

4. PRESS
Press down and allow sufficient time for LTS-PLUS to solidify the waste, because solids will not spill, aerosolize or splash.

5. PROCESS
Process in accordance with local and state regulations.

Carb-O-Lime Absorbent Granules Efficiently Remove Carbon Dioxide

CarboLime is a granular soda-lime absorbent for the efficient removal of carbon dioxide from closed and semi-closed patient breathing circuits. Contains no potassium hydroxide. Minimum dust levels with the benefits of high surface area and graded particle size. Low bulk density. Low risk of carbon monoxide formation due to good reisistance of dry gas desiccation. Low odor due to reliable control of indicator dye concenntration.

PRODUCT

TrachVox™ Innovative Technology for Tracheostomy Patients

latexfree

TrachVox is an innovative solution for providing <u>spontaneously breathing</u> tracheostomy patients with the ability to verbally communicate. TrachVox is also a tracheal-connected HME (Heat and Moisture Exchanger). The HME can be depressed which changes the airway flow and allows the patient the ability to speak even with a tracheostomy device.

- Heats and humidifies inspired air of spontaneously breathing patients
- Offers supplemental oxygen through integrated port
- Allows for forced inspiration, expiration and suctioning
- Tested to ISO Standard 9360-1 specifications
- Standard 15 mm connector
- Compact and lightweight
- Patient comfort and minimal trach tube stress

Item #	Description	Pkg
EMS3131010	TrachVox	30

Oxygen connection requires the standard tubing connection to be cut off and the tubing connected to the oxygen inlet port.

Helps tracheostomy patients become active and maintain a healthy lifestyle.
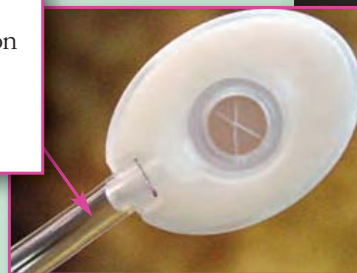

Medicare Reimbursable A7507

Tracheostomy Tube Holder (Infant to Adult)

Keeps tracheostomy tube securely in place. Soft strap features an adjustable Velcro closure. Soft compliant foam laminate with elastic adjustment increases patient comfort and accommodates coughing and edema while still providing a snug fit. Soft twill ribbon between collar and tube helps prevent sliding, patient irritation, and helps prevent neck band from becoming soiled.

The *Simplicity* CPAP Line

HCS903

The CPAP Product Line demonstrates our commitment to advancements in CPAP technology.

RestEZ II is engineered with an internal pressure transducer that provides real-time measurements to ensure that the prescribed pressure settings are always being delivered to the patient. The transducer will adjust the blower when a loss of pressure occurs due to resistance in the interface circuit or changes in altitude. This Dynamic Calibration feature can also be used to overcome the resistance inherent in nasal prong interfaces. Built in Auto Compliance feature monitors usage and provides an early identification which creates an opportunity for intervention in the event of a non-compliant patient. The RestEZ Compliance model (HCS903) has enhanced features for measuring and downloading patient compliance data and an Interface Alert, which notifies the patient every 90 days that their interfaces needs replacing.

CPAP Accessories Cleaner

Purpose: Maximize Patient CPAP Therapy Compliance

• Alcohol-Free and Solvent-Free (Natural)
• No odor or residue left behind after cleaning
• Cleaner dries on its own and does not need to be rinsed (no rinsing)
• Wipes will last 2 months for every patient, if they use one daily
• The 1.5oz & 8oz Traveler Spray canisters are propelled by Compressed Gas

Benefits:
Allows the mask usage to be maximized (up to 3 months)
Minimize extra mask expense without reimbursement (3 months – CMS)
Allows the mask to fit properly without over-tightening
Maximize profitability with fewer service calls and expense

GMCL535026	Oxygen Hose, 6' with DISS fittings	each
GMCL270220	Oxygen Regulator, 2 DISS, 1 Barb outlet, 870CGA	each
GMC800149	Internal Air Filter (replace when soiled)	3/pkg
GMC800148	CPAP Ventilator Circuit 3', EXH Valve, Cuffed, Adult #5 Mask	6/cs

All systems comply with International Standards of FDA and Canada

Specifications:

L760 AutoVent 4000
> Dimensions: 2.9" x 9.6" x 6.5"
> Weight: 3.7 lbs.
> Weight w/CPAP: 5.2 lbs.

L761 AutoVent 4000 with Air Mix Mode
> Dimensions: 2.9" x 9.6" x 6.5"
> Weight: 4.2 lbs.
> Weight w/CPAP: 5.7 lbs.

L762 Autovent 4000 with Air Mix Mode & Electronic Alarm Package
> Dimensions: 2.9" x 9.6" x 8.0"
> Weight: 4.9 lbs.
> Weight w/CPAP: 6.4 lbs.

L763 AutoVent 4000 with Electronic Alarm Package
> Dimensions: 2.9" x 9.6" x 8.0"
> Weight: 4.4 lbs.
> Weight w/CPAP: 5.9 lbs.

Introducing the
EPV100 Portable Ventilator
for Mass Casualty Preparedness

- **Designed to Meet Surge Capacity**
- Light and Easy to Operate
- Powered by Compressed Gas
- **Suitable for Stockpiling or Everyday Use.**

Item #	Description	Pkg
EPV100	Portable Ventilator, 6' disposable O2 tubing, 3' ventilator circuit with swivel, adult disposable cuffed mask, filter	each
Accessories		
L599-130	3' Ventilator Circuit, with swivel, adult disposable cuffed mask, filter	10/cs
L535026	6' Oxygen Hose, reusable	each
L270-220	Oxygen Pressure Regulator, 0-25 lpm, 2 check valves, hose barb outlet★	each

★Additional LSP Oxygen Pressure Regulators with check valves are available

iVent201 Making Patient Care Simpler

Use it in <u>sub-acute</u> and <u>nursing homes</u>.
Easy software upgrades.
Make your patients more comfortable than ever.
Easy to Learn Easy to Use

The *i*Vent201's Adaptive Flow™ and Easy Exhale™ features provide unprecedented patient comfort. These breakthrough technologies keep patients from "fighting the ventilator" by letting their needs spontaneously determine flow rate.

Item #	Description	Pkg
VRS501I2201HC	**iVent HC** (Home Care/Nursing Home):	each
	Modes: Volume Control (A/C or SIMV), CPAP/PSV Low Pressure Oxygen.	
VRS501I1201IC	**iVent201 IC** (Intensive Care):	
	Modes: Pressure Control (A/C or SIMV), Volume Control (A/C or SIMV), CPAP/ PSV	each
	Software Packages Included: Pressure, Flow and Volume Waveforms, Trending and Respiratory	
	Diagnostics, Internal Oxygen Mixer with Sensor, High and Low Pressure Oxygen, MRI Compatible

Quality Respiratory Care Products You Can Always Depend On.

Quality is key in any business and especially where people's lives can depend on the performance of our products, quality is everything. That is why everything we do starts and ends with our customer. Our livelihood rests solely on our ability to provide quality respiratory and anesthesia care products where and when our customers need them. We stand behind each and every one of our products and guarantee they will perform flawlessly and without complication.

One of the strongest demonstrations of Medline's commitment to the production of consistently high quality products is the adherence to the Food and Drug Administration's (FDA) Quality System Regulation (QSR), International Organization for Standardization (ISO) and European Norm (EN) standards. Medline has divisions registered to ISO9001 and EN46001 Quality Management Systems. Bestowed by AFAQ, the French association for third party certification of quality systems, ISO certification is granted only after rigorous analysis of a company's quality systems.

Process control from equipment design through validation enables us to provide customers the consistency they expect.

Medline is Your One-Stop Shop

Medline offers everything you need to become the only place you purchase your respiratory products from. With quality products, excellent customer service, and satisfaction guaranteed; Medline wants to become your one source.
