- 1 OXEPA is clinically shown to modulate the inflammatory response in critically ill, mechanically ventilated patients, especially those with SIRS (systemic inflammatory response syndrome, eg, sepsis, trauma, burns), ALI (acute lung injury) or ARDS (acute respiratory distress syndrome).^{1,2,3}
- 1 For tube feeding.
- 1 For sole-source nutrition.
- 1 Use under medical supervision.
- 1 Calorically dense (1.5 Cal/mL)—concentrated calories for fluid-restricted patients.
- 1 Unique oil blend—contains 4.6 g/L of EPA* and 4 g/L of GLA,[†] to help modulate inflammation.^{4,5,6}
- 1 Elevated antioxidants vitamin C, vitamin E, and beta-carotene.
- 1 Meets or exceeds 100% of the RDIs for 24 essential vitamins and minerals in 1420 Cal (946 mL).
- 1 Halal.
- 1 Gluten-free.
- 1 Suitable for lactose intolerance.

Safety Precautions

- 1 Not for parenteral use.
- 1 Not for people with galactosemia.
- 1 **Feeding sets are for single-patient use only. Use clean technique to avoid set and/or product contamination.**

* EPA = eicosapentaenoic acid (from marine oil)
† GLA = gamma-linolenic acid (from borage oil)

Ingredients

Liquid Unflavored:

Water, Sodium & Calcium Caseinates, Sugar (Sucrose), Corn Maltodextrin, Canola Oil, Medium-Chain Triglycerides, Marine Oil (May Contain One or More of the Following: Anchovy, Menhaden, Salmon, Sardine, Tuna), Borage Oil, Magnesium Chloride, Calcium Phosphate, Soy Lecithin, Potassium Citrate, Sodium Citrate, Ascorbic Acid, Potassium Phosphate, Natural & Artificial Flavor, Choline Chloride, Taurine, d-Alpha-Tocopheryl Acetate, L-Carnitine, Salt (Sodium Chloride), Gellan Gum, Zinc Sulfate, Ferrous Sulfate, Niacinamide, Calcium Pantothenate, Manganese Sulfate, Cupric Sulfate, Thiamine Chloride Hydrochloride, Pyridoxine Hydrochloride, Riboflavin, Beta-Carotene, Vitamin A Palmitate, Folic Acid, Biotin, Chromium Chloride, Sodium Molybdate, Potassium Iodide, Sodium Selenate, Phylloquinone, Cyanocobalamin, and Vitamin D3.
Allergens: Contains milk and soy ingredients.

Availability

List Number	Item
54386	Oxepa / 8-fl-oz (237-mL) Can / 24 ct
62717	Oxepa Ready-To-Hang / 1000-mL (1.1-QT) Bottle / 8 ct

Liquid Unflavored Footnotes & References

Per 8 fl oz (237 mL)

*RDI percentages for adults and children 4 or more years of age.

Per 1000 mL

*RDI percentages for adults and children 4 or more years of age.

Preparation

Instructions for Use: 8-fl-oz-can

- 1 Store unopened at room temperature; avoid extreme temperatures.
- 1 Shake well.
- 1 Clean top of container thoroughly before opening.
- 1 Once opened, cover, refrigerate and **use within 48 hours**.

Tube Feeding:

- 1 Follow physician's instructions.
- 1 Adjust flow rate and volume according to patient's condition and tolerance.
- 1 Feed by pump at room temperature with an 8 Fr or larger tube; use a 10 Fr or larger tube for gravity feeding.
- 1 Additional fluid requirements should be met by giving water between or after feedings or when flushing the tube.
- 1 Avoid contamination during preparation and use.

Instructions for Use: Ready-To-Hang Container

All liquid medical foods, regardless of type of administration system, require careful handling because they can support microbial growth. Follow these instructions for clean technique and proper setup to reduce the potential for microbial contamination. NOTE: Failure to follow the **Instructions for Use** increases the potential for microbial contamination and reduces hangtime.

- 1 Pump feeding is recommended; use an 8 Fr or larger tube. If gravity feeding use a 10 Fr or larger tube.
- 1 Administer product at room temperature.
- 1 THOROUGHLY wash hands with soap and water before handling container or feeding set.
- 1 Turn container upside down and SHAKE VIGOROUSLY, using a twisting motion for at least 10 seconds.
- 1 DO NOT touch any part of the container or feeding set that comes into contact with the formula.
- 1 When initiating feeding, follow physician's instructions. Adjust flow rate and volume according to patient's condition and tolerance.
- 1 Additional fluid requirements should be met by giving water between or after feedings or when flushing the tube.
- 1 Always follow directions for use provided with feeding set.

For Use with Enteral Feeding Set:

- 1 Remove the dust cover from the Abbott RTH Safety Screw Cap.
- 1 Remove the dust cover from the safety connector on the feeding set.
- 1 Insert the safety connector into the port on the Abbott RTH Safety Screw Cap, completely pierce foil.
- 1 Turn the safety connector clockwise until it is securely fastened.
- 1 Close clamp on set before inverting container.
- 1 Invert container and suspend, using the hanging ring on the bottom of the container.
- 1 Unless a shorter hang time is specified by the set manufacturer, hang product for up to 48 hours after initial connection when clean technique and only one new set are used. Otherwise hang for no more than 24 hours.
