

UHS FLOOR FINISHES

NOVA X®	INTERSTATE 50®	EXCEL®	GRAND-PRIX®	QUASAR®
EXTRAORDINARY UHS STAR SHINE FLOOR FINISH	SELF-SEALING, FAST RECOAT, VARIABLE UHS FLOOR FINISH	URETHANE-FORTIFIED, DURABLE, BRIGHT-DRYING FLOOR FINISH	HIGH GLOSS FOR UHS SYSTEMS (2000+RPM)	DIAMOND-LIKE GLOSS, SPECTACULAR UHS RECOVERABILITY
Uses the newest technology to provide the highest initial gloss and the highest burnished gloss . Provides the durability of a hard finish, but repairs upon burnishing like a soft finish. Self-sealing.	Provides a long track record of performance on heavy traffic retail store vinyl composition floors. Formulated for high speed and ultra high speed maintenance programs, but works well with any maintenance system.	Patented, non-yellowing Polyacrythane (acrylic/urethane dual copolymer) based formula provides an "All Systems" finish that is ultra high speed burnishable, spray buffable and bright drying.	Provides a tough film that responds to high speed buffing or burnishing and stands up to repeated clean and burnish cycles. Ideal for use with Ultra High Speed Burnishing Machines (machines that turn greater than 2000 rpm).	A high solids floor finish that provides rapid gloss build with minimal coats. This acrylized formulation produces a clear, color free, high gloss finish that requires little maintenance. QUASAR produces a star-like shine when burnished.
Designed for daily or frequently burnished high traffic floors in grocery stores, retail locations, health care, schools and universities. Great on vinyl composition, terrazzo and other floors.	Stands up to daily scrub and burnish cycles. Ideal for grocery stores, retail stores, schools and universities. For use on vinyl, vinyl composition, asphalt, terrazzo, concrete and sealed wood.	Use on all types of resilient and non-resilient floors which include vinyl composition, rubber, asphalt, quarry, terrazzo and sealed wood floors.	Use on all types of resilient and non-resilient floors which include vinyl composition, rubber, asphalt, quarry, terrazzo and sealed wood floors.	Use on all types of resilient and non-resilient floors which include vinyl composition, rubber, asphalt, quarry, terrazzo and sealed wood floors.
