

Bath and Transfer Benches

With hard surface areas that get wet and slippery, the bathroom is the most dangerous room in the house for slips and falls. Bathrooms are the most used and most hazardous areas of a home. According to the Centers for Disease Control and Prevention, nearly 70 percent of nonfatal bathroom injuries for patients aged 15 and older occurred around the bathtub or shower. McKesson bath and transfer benches feature non-skid tips, durable construction and convenient drainage holes. These products fit most standard tubs and are designed to help reduce the risk of slipping or falling while bathing. McKesson's bath transfer benches fit over the edge of the bathtub, enabling a person with limited mobility to safely enter the tub while remaining seated. Models are available with additional features such as removable or reversible backs and handles or adjustable heights to accommodate user's individual needs and preferences.

Features and Benefits

Premium Plastic Bath Chair

- 1/2-inch leg adjustments accommodate uneven surfaces and height preferences with an indicator window displaying the chosen level
- Enhanced, comfort seat fits most shapes and sizes
- Premium plastic material with large, stable legs and non-slip feet to provide lightweight design without sacrificing security and support
- Removable back, legs, and arms for convenient storage and travel
- Easy-to-clean, all-plastic design provides solution against rusting and buildup
- Tool-free assembly
- Retail packaging
- Not made with natural rubber latex

Satisfaction Guaranteed

If you are not completely satisfied with any McKesson Brands product, you may return it for a full refund or credit.
