

Blunt Fill Needles

McKesson blunt fill needles are ideal for use in a variety of medical, pharmaceutical and laboratory procedures to extract fluid or medication from vials for transfer or for irrigation. They can be used to draw up or reconstitute medication or accessing IV bags. Designed for penetration into vials and IV bags, not for patient injection.

Features and Benefits

- Features a 45° bevel to help reduce accidental needlesticks
- Easy to draw and mix viscous medicine with 18-gauge needle
- Standard luer hub designed to fit on all standard luer lock syringes
- Red hub and cap to quickly identify type as fill needle
- Includes protective cover for safer use and disposal
- Disposable, individually packaged for convenient single sterile use
- Not made with natural rubber latex
