

Anesthesia Masks

McKesson Anesthesia Masks are designed to provide premium performance in administration of gas anesthesia. Masks are meant to be pliable with a contoured teardrop design to help ensure patient comfort and system efficacy. Requires low hand pressure to hold in place, thus providing enhanced clinician comfort by reducing hand and arm strain. Masks feature a soft, pliable, air-filled cushion that easily conforms to the face with a low-pressure, high-contact seal. The face plate is a high-strength, crystal-clear plastic. The device's clear design aids in recognition of the patient's condition. The connector fits breathing circuit and resuscitation devices securely. All masks have an adjustable inflation valve on the cushion, and feature removable hook rings that allow for attachment of a head strap for hands-free usage. Color-coded packaging provides additional matching support (see chart below for colors/sizes).

Features and Benefits

- Clear design allows for monitoring of patient while administering gas anesthesia
- Soft, elastomeric cushion with adjustable inflation valve fits virtually all facial configurations and improves sealing capabilities
- Color-coded packaging allows for easy matching of product size to patient
- Teardrop design and air cushion with adjustable inflation valve offer better patient fit
- Contoured design helps to eliminate the possibility of corneal abrasion
- Available in neonate, infant, pediatric and adult sizes (small, medium and large)
- Not made with natural rubber latex

Satisfaction Guaranteed

If you are not completely satisfied with any McKesson Brands product, you may return it for a full refund or credit.

Never Compromise on CareSM
