

ESSENTIAL INGREDIENTS

ALLANTOIN moisturizes, soothes and smooths the skin by increasing the water content of the upper layers of the epidermis

ARGININE helps to build new cells in the epidermis to speed recovery of chafed and damaged skin

CANOLA OIL, GRAPESEED OIL and **SHEA BUTTER** are emollients that form a thin film on the surface of the skin and make the external layers of the skin (epidermis) softer and more pliable by reducing evaporation and water loss

CITRONELLYL METHYLCROTONATE is a lemon grass derivative that neutralizes urine odor

FLAX SEED BIOCOMPLEX (**extract** and **oil**) is an occlusive and skin conditioning agent that nourishes and softens the skin

FLAX SEED EXTRACT is a skin conditioning agent that nourishes and softens the skin

GLYCERINE is a humectant that helps to hydrate the skin, thus smoothing it

PANTHENOL is a humectant that moisturize the skin and soothes irritation

UREA is a humectant that helps to hydrate the skin, thus smoothing and protecting it. It is a principal component of the NMF (Natural Moisturizing Factor) that healthy skin creates. The level of NMF in the epidermis decreases with age, so its important components should be reconstituted using skin-care products.
