

SEPARATIONSCREEN

SEPARATIONSCREEN

The Cough Screen
and Sneeze Guard
Virus-Barrier

— Peace of Mind for Employer, Employee & Customer —

SeparationScreen, a sneeze guard and protective desk and counter barrier, facilitates personal interaction but creates a virus-barrier by separating customer and employee. **SeparationScreen** is designed to protect employees and customers from airborne, virus-containing droplets caused by speaking, sneezing, laughing or coughing, that could infect those who have face-to-face interactions.

Mitigate the Transmission of Coronavirus

SeparationScreen was created to ensure all workplaces implement the protective measures recommended by the **CDC & World Health Organization**.

The **CDC** recommends installing physical barriers when possible to limit the opportunity of spreading viruses through direct person to person contact and airborne exposure. **SeparationScreen** was specifically designed to protect employees and customers when they must interact and come in contact with each other during the normal course of life.
